

DEVOPS AND FULLSTACK – LAB

SAI THRISHOOL

2303A51127

BATCH – 03

16 – 02 – 2026

This screenshot shows the initial setup of a project in VS Code. The Explorer panel on the left shows the file structure with 'integration.test.js' selected. The main editor displays the content of 'integration.test.js', which includes imports for 'supertest' and 'request', and a test suite for 'Personal Finance Tracker Integration Tests'. The test suite contains a single test 'Create Expense' that sends a POST request to '/api/expenses' with a title of 'Food' and an amount of 500. The bottom panel shows the terminal output of the command 'npm install --save-dev jest supertest', which includes several deprecation warnings for 'inflight', 'glob', and 'glob@10.5.0'.

```
tests > integration.test.js > describe('Personal Finance Tracker Integration Tests') callback > test('Create Expense') callback > res

1 const request = require('supertest');
2 const app = require('../server');
3
4 describe('Personal Finance Tracker Integration Tests', () => {
5
6     test('Create Expense', async () => {
7         const res = await request(app)
8             .post('/api/expenses')
9             .send({
10                 title: "Food",
11                 amount: 500
12             })
13     });
14 });
```

PS C:\Users\saith\Desktop\Devop-4\finance_tracker> npm install --save-dev jest supertest
npm warn deprecated inflight@1.0.6: This module is not supported, and leaks memory. Do not use it. Check out lru-cache if you want a good and tested way to coalesce async requests by a key value, which is much more comprehensive and powerful.
npm warn deprecated glob@7.2.3: Old versions of glob are not supported, and contain widely publicized security vulnerabilities, which have been fixed in the current version. Please update. Support for old versions may be purchased (at exorbitant rates) by contacting i@izs.me
npm warn deprecated glob@10.5.0: Old versions of glob are not supported, and contain widely publicized security vulnerabilities, which have been fixed in the current version. Please update. Support for old versions may be

This screenshot shows the execution of the tests in the 'finance_tracker' project. The Explorer panel shows 'integration.test.js' selected. The main editor displays the content of 'index.js', which includes a 'PORT' variable set to 3000. The bottom panel shows the terminal output of the command 'node index.js' and 'npm test'. The output shows that the tests passed, with a summary of the results: 'Test Suites: 1 passed, 1 total', 'Tests: 5 passed, 5 total', 'Snapshots: 0 total', and 'Time: 1.816 s'. The test suite is 'Personal Finance Tracker Integration Tests' and the tests are 'Create Expense (99 ms)', 'Fetch Expenses (10 ms)', 'Create Income (11 ms)', 'Fetch Income (11 ms)', and 'Dashboard Summary (11 ms)'.

```
3 const PORT = 3000;
4
5 const app = express();
6 app.use(bodyParser.json());
7 app.use(bodyParser.urlencoded({ extended: true }));
8
9 app.get('/', (req, res) => {
10     res.json({ message: 'Welcome to the Personal Finance Tracker API' });
11 });
12
13 app.post('/api/expenses', (req, res) => {
14     const { title, amount } = req.body;
15     if (!title || !amount) {
16         res.status(400).json({ message: 'Title and amount are required' });
17         return;
18     }
19     // In a real application, you would save this expense to a database
20     res.json({ message: 'Expense created successfully', expense: { title, amount } });
21 });
22
23 app.get('/api/expenses', (req, res) => {
24     // In a real application, you would fetch expenses from a database
25     res.json({ message: 'Expenses fetched successfully', expenses: [] });
26 });
27
28 app.post('/api/income', (req, res) => {
29     const { amount } = req.body;
30     if (!amount) {
31         res.status(400).json({ message: 'Amount is required' });
32         return;
33     }
34     // In a real application, you would save this income to a database
35     res.json({ message: 'Income recorded successfully', income: { amount } });
36 });
37
38 app.get('/api/income', (req, res) => {
39     // In a real application, you would fetch income from a database
40     res.json({ message: 'Income fetched successfully', income: [] });
41 });
42
43 app.get('/api/dashboard-summary', (req, res) => {
44     // In a real application, you would fetch dashboard summary from a database
45     res.json({ message: 'Dashboard summary fetched successfully', summary: {} });
46 });
47
48 app.listen(PORT, () => {
49     console.log(`Server is running on port ${PORT}`);
50 });
```

PS C:\Users\saith\Desktop\Devop-4\finance_tracker> node index.js
PS C:\Users\saith\Desktop\Devop-4\finance_tracker> npm test
> finance_tracker@1.0.0 test
> jest --runInBand

PASS tests/integration.test.js
Personal Finance Tracker Integration Tests
✓ Create Expense (99 ms)
✓ Fetch Expenses (10 ms)
✓ Create Income (11 ms)
✓ Fetch Income (11 ms)
✓ Dashboard Summary (11 ms)

Test Suites: 1 passed, 1 total
Tests: 5 passed, 5 total
Snapshots: 0 total
Time: 1.816 s
Ran all test suites.
